

Many account holders are confused as to how to link Aadhaar with a Demat account online. Your Aadhaar Card can be linked with your Demat account using the following simple steps:

## Steps to link Aadhaar with a Demat account online

To link your Aadhaar number with a CDSL demat account, you can:

Go to the **CDSL** web portal

Select Click Here to Link Aadhaar Number to Demat Account

## Enter your:

- DP name
- DP ID
- Client ID
- PAN
- Contact number

Enter the one-time password (OTP) sent to your registered mobile number and email

Enter your Aadhaar number, gender, and date of birth

Enter the second OTP

Confirm the link via SMS and email.

- To link your Aadhaar number with a NSDL demat account, you can:
- Step 1: Visit the NSDL website
- **Step 2**: Click on "Click here to link Aadhaar Number to Demat Account" option on the page
- Step 3: Enter the name of your Depository Participant, DP ID, your client ID, and PAN details
- Step 4: An OTP will be sent to your registered mobile number and email ID
- Step 5: Enter the OTP and click proceed
- **Step 6**: Enter your Aadhaar details and other necessary details and click proceed
- Step 7: An OTP will be sent to your mobile number registered with Aadhaar
- Step 8: Enter the OTP and click Submit

## How to know if your Aadhaar has been linked with your Demat Account

You can quickly check if your Aadhaar has been successfully linked with your Demat account by following the below-mentioned steps:

- 1. Visit the UIDAI website
- 2. Click on Check Aadhaar Linked account
- 3. Enter your 12-digit Aadhaar number
- 4. You will receive an OTP on your mobile, enter that in the OTP field
- 5. You will be able to see all accounts including your Demat account linked to your Aadhaar

## Advantages of linking your Aadhaar with your Demat Account:

- Linking of Aadhaar with Demat account reduces documentation required for Trading
- 2. Quick and easy eKYC approval as all details are authenticated using your Aadhaar card
- 3. Demat accounts which are not linked to Aadhaar cards could face possible deactivation
- 4. Enables easy monitoring for the regulators and aids in the prevention of frauds
